

Fixed Issues in Release 2024.03

Component	Issue	Description
Access Control	CE-120818	A user cannot access the record page in edit mode if they do not have access to the Contacts application.
Admin Dashboard, NextGen Dashboard, Reports, Workspaces, Dashboards and iViews	CE-120847	The page goes blank when the heat map is added to the dashboard.
Application Builder	CE-120875	The "Created By" and "Last Updated By" fields for those fields go blank if the user who created or last updated the application and fields is no longer in the system.
Application Builder	CE-120858	When attempting to modify the formula, the formula editor freezes and causes the web browser to crash.
Application Builder	CE-120810	When clicking the 'Edit Values' button for a Values List a second time, the pre-loaded pop-up window transforms into a new browser window, displaying a full Archer page.
Application Builder	CE-120808	When the user changes the color of the Global Values list value, the UI freezes and the color pallet disappears.
Application Builder	CE-120589	When a values list value name contains "<" or ">" symbols, the formula editor shows the name with "<" or ">" appropriately.
Application Builder, Data Driven Events	CE-120781	DDE not working properly when moving between Text Area fields.
Bulk Operations	CE-120884	The user cannot run or delete the correct Bulk Schedule if the Bulk Schedule Application is collapsed.
Bulk Operations	CE-120862	An exception occurs when a scheduling action is created for an application that has an inactive cross reference field.
Bulk Operations	CE-120842	Schedule Run Detail Report - Statistics section display is partially cut off
Bulk Operations	CE-120759	The Run Details do not display any error messages when a Bulk Action job's content save fails due to a validation issue.
Bulk Operations, Workflow (AWF)	CE-120791	AWF Bulk Update Jobs failing with unexpected error.
Caching	CE-120849	Redis timeout error reveals server endpoint name information on the Archer interface.
Charts and Graphs	CE-120550	The exported pie chart does not show the percentage values.
Config Service Client	CE-120005	Services sometimes do not process the jobs on the instance refresh
Data Driven Events	CE-120554	On the record page, the field content collapses to the right.
Data Driven Events	CE-120272	When a DDE operation triggers on a field, the field and its contents slides to the right.
Data Driven Events, Navigation, Record Page	CE-120730	The read only questionnaire related record field does not show the 'view all' link.
Data Feeds	CE-120835	When an Archer to Archer datafeed processes an attachment field with Turkish file names, a warning is displayed.
Data Feeds, JS Transporter	CE-120876	JS-Datafeed fails due to synchronization issues when run on high performance system with S3 enabled.
Data Import	CE-120558	The run details shows create count instead of failure count when the data feed or data import fails.
Database	CE-120140	The admin dashboard job fails with a time out error due to the large amount of data.
Inline Edit	CE-120815	The unsaved changes warning shows even after the inline edit changes are saved.
Keyboard Navigation	CE-120866	When using the Enter key to open a hyperlink, the user profile displays incorrect user details.
Master Report Listing	CE-120101	The user gets redirected to the home page if they access the report listing page before the global navigation menu loads.
Navigation, Record Page	CE-120832	Archer is producing console errors when navigating within a record.
Navigation, Section 508	CE-120735	Screen readers cannot identify the header and footer of the page, page navigation, and primary activity because there are no landmark roles provided.
Notifications	CE-120890	If the user saves the subscription notification without viewing the delivery tab, a validation error message appears.
Packaging	CE-120896	The 'Installed By' field in the package installation log displays the incorrect user details.
Questionnaires	CE-120809	Auto-generate Findings saves Finding field which is required even when there is no values added
Questionnaires	CE-120772	The text field and values list field content are not saved on the customized application.

Internal Use

Record Page	CE-120869	When image link is added in a text area field after hyperlink, it erases all the data in the text field
Record Permissions	CE-120892	The record permission field rule that has a filter condition referring to the automated record permission field does not display the group.
Reports	CE-120813	The Reports Listing page shows the report that is linked to the inactive solution.
Reports	CE-120705	Modifying the "Risk Assessments - Due Date Calendar" core report does not retain the color.
Reports	CE-120386	Questionnaire Campaign report deep link opens a blank report.
Reports	CE-121008	Making changes to the personal report makes it available to everyone.
Section 508, Workspaces, Dashboards and iViews	CE-120738	The screen readers do not announce when you open the workspace using the keyboard.
Security	CE-120792	Installer files contain unprivileged, hardcoded password string.
Security	CE-120790	An authenticated user could manipulate application resources to gain unintended read access to a private report.
Security	CE-120283	Maximum Length Exceeded Validation message is not shown and the content is saved, when a proxy is used to intercept and alter the request.
UI	CE-120916	Keyboard focus moves out of the 'About' dialog box when using the Tab key.
Workflow (AWF)	CE-120782	"This record does not have a workflow associated with it" message appears despite an active job viewable in AWF job troubleshooter.
Workflow (AWF)	CE-120701	Web tier connectivity issues causing AWF jobs to fail
Workspaces, Dashboards and iViews	CE-120757	Switching to the classic dashboard shows the wrong report.
Workspaces, Dashboards and iViews	CE-120749	When shifting from a workspace with quick links to a workspace with no quick links, the Quick links of the old workspace are shown.
Workspaces, Dashboards and iViews	CE-120737	Interface elements within the Issues Management Dashboard were not compatible with Accessible Rich Internet Applications (AIRA) guidelines.
