

# Fixed Issues in Release 2024.06

Component	Issue	Description
Access Control	CE-120996	The total number of active users is not consistent across the Manage Users page and the Archer Configuration reports.
ACP, Database, Job Framework	CE-120860	DeleteFieldContentMetadataWorkflow job fails when the specific field is present in tblModuleNavMenuConfig table.
ACP, Session	CE-120886	When the session timeout warning is activated with Windows login SSO, the user cannot access Archer because of the default session expiration behavior.
Application Builder	CE-121115	Default tab is not selected by default after the DDE is triggered.
Application Builder	CE-121061	When a user tries to remove content from an application that has a scheduler field set, a foreign key constraint error occurs.
Application Builder	CE-121035	The subform name of the application builder gets cut off on high-resolution monitors.
Application Builder	CE-121011	The help text in the History log field gets cleared when the user creates a text field.
Application Builder	CE-120956	Subform's cross-reference fields are displaying the hidden Related Records field in the Object list of the cross-referenced application.
Application Builder	CE-120589	The formula editor displays the value name with "&lt;" or "&gt;" correspondingly when a values list value name contains "<" or ">" symbols.
Application Builder, Database	CE-121010	The application cannot be copied due to an improper filter and a missing dependency on the value list value deletion.
Application Builder, Workflow (AWF)	CE-120746	AWF Design in the Designer page goes blank suddenly.
Attachments	CE-121021	The general user is unable to view the attachments in edit mode.
Bulk Operations, Packaging	CE-119900	When a user deletes a field that is configured in a schedule action, the deleted field reference causes the package creation to fail.
Bulk Operations, Security	CE-120983	The Bulk Update and Bulk Delete progress status bar does not show progress beyond 0% for general users.
Bulk Operations, Workflow (AWF)	CE-121097	Advanced workflow process can be saved with double quotes (") and Backward Slashes (\) in node names due to which the Bulk Update Jobs process fails.
Calculations	CE-121175	When there are multiple cross reference records and the user group list field value in just one of those records is empty, the COUNTA method throws an error.
Calculations	CE-120882	A calculated text field that uses the IF function to reference a plain text field throws the "_invalid expression" error, when the data has a leading plus sign.
Charts and Graphs	CE-121058	In a statistical report, after selecting various colors for a custom color palette, just one color is selected for the chart lines.
Config Service Client	CE-121009	Config service updating monitoring tables too often causing unnecessary load on Config DB.
Config Service Client	CE-120715	Upon instance import, the instance web configuration does not have the vanity URL settings.
Config Service Client	CE-120171	Orphaned instance properties appears after an instance is deleted or refreshed.
Content API	CE-120926	When creating or editing a record using the content API, there are specific user-agent configurations that result in an HTTP 401 Unauthorized error.
Data Driven Events	CE-121149	When the record page is in view mode, DDE hides the External Field name but not its value.
Data Feeds	CE-120920	When the user copies the data feed with tokens, the tokens are not present in the copied data feeds.
Database	CE-120646	In certain scenarios the value list delete operation causes an error and prevents to delete the application.
Database, Job Framework	CE-121029	In the tblDirtyCalcContent table, duplicate entries cause timeout issues while cleaning up.
Database, Jobs	CE-120483	Timeout error during cleanup part of the CondenseExecuteWorkflow job leads data to grow over multiple executions.
Database, Workflow (AWF)	CE-120853	Advanced Workflow Cleanup job fails when there is a large amount of data in WP_USER_DATA table.
Export	CE-121116	The values list value's other text that is lengthy gets cut down when a record is exported to a PDF file.
Export	CE-121032	The resolution of the exported report appears low when printed from a browser.
Export, Mail Merge	CE-120961	When a user clicks on a link in the mail merge export PDF file, an "invalid request" error message displays.
Export, Reports	CE-120918	The export record does not show all the data if it contains related records fields and multilevel data.
Global Search	CE-121129	When a search text contains "&," the global search ignores the text after '&' and returns incorrect search results.
HTML Sanitizer, Record Page	CE-120851	The larger text that is entered into the text area field from Word or Excel exceeds the field span size.

Inline Edit, Record Page	CE-120941	The page loads indefinitely if changes are made to the cross reference field or related record field value using inline edit and then canceled.
Jobs	CE-121137	Sub-Form Cleanup job fails due to records created by legacy workflow.
Jobs	CE-121046	Metadata job fails with a delete statement conflict error.
Logging	CE-121078	When there are no records in the report, the Archer Web Transporter data feed generates an error in the log file.
Master Report Listing, Reports	CE-120994	Unexpected error throws for a Report when applied 2 filters with subform field with actual no subform records in it.
Nav Menu	CE-120986	Activity widget does not display any data when an application is deleted for which the activity has been recorded.
NextGen Dashboard, Workspaces, Dashboards and iViews	CE-121051	The selected embedded image doesn't appear in the landing page background if the image name has space in it.
Notifications	CE-120998	On-Demand Notifications ignore the From Alias added in the Global Notification settings.
Notifications	CE-120981	The user do not receive email notification if the application has more number of fields. Due to the code dependency with .Net version, it needs to be updated to 4.8.
Notifications	CE-120939	The subscription notifications frequency becomes incorrect due to an improper interval setting.
Notifications	CE-120820	The notification email does not contain the MRDC field if it is configured in the notification subject.
Performance, Record Page	CE-121100	Slowness in records after SaaS upgrade to 2024.03/6.15 .
Queuing Service	CE-121083	Large number of errors on queueing servers after decommissioning old queueing servers after migration to KISS.
Record Page	CE-121114	When a user clicks the cross reference record after the text field, the page loads indefinitely.
Record Page	CE-121036	The number of records per page on the record lookup page varies between applications.
Record Page	CE-120932	The unsaved changes box does not show up when a user accesses the reference record from the parent record and the parent record updates are not saved.
Record Permissions	CE-120942	When a related record gets deleted, the record permissions field that is inherited through an internal cross-reference remains unchanged.
Reports	CE-121098	The statistical report drill down configuration with advanced operator logic returns more records than expected.
Reports	CE-121095	Some iViews with Chart only reports do not display any data inaccurately.
Reports	CE-121069	Statistical report does not show the aggregated field names in the column header.
Reports	CE-120931	The 'Solutions' column filters in the Archer Configuration Report fail to produce the expected results and throws unexpected errors.
Reports, Section 508	CE-121042	The screen reader reads the 'save' button as 'link' instead of 'button'.
Search and Search Results	CE-121145	When a user attempts to create a report using the user group list filter but is not a member of any of the specified groups, an unexpected issue occurs.
Search and Search Results	CE-121068	In the report filter by user group field, the lookup results for the users are not correctly sorted by last and first name.
Search and Search Results	CE-121089	Improvement to SessionState\Save API request to restrict the payload to only contain required parameters.
Section 508, UI	CE-121000	Screen reader announces 'Record status collapse button expanded' when record status is in expanded state and announces as 'Record status expand button collapsed' when same control is in collapsed stated which is incorrect as collapse/expand defines with label of control even after state property is already present.
UI	CE-121080	For users with Japanese locale, Skip Navigation link do not display properly.
UI	CE-120982	Screen reader announces incorrect role for controls like 'plan commitment date' , 'Expiration Date' on 'Create new record' screen.
UI	CE-120974	When the keyboard 'Tab' key focuses on the dashboard dropdown list, the focus becomes invisible.
UI	CE-120193	The screen reader reads the dropdown as a 'links' instead of 'lists'.
User Profile	CE-121054	When "&" symbol is used in User creation/update, it is displayed and saved as "&amp;" instead of "&".
Workflow (AWF)	CE-121124	AWF Job Troubleshooter does not work when instance name starts with 'OR'.
Workflow (AWF)	CE-121087	Unable to create new rule for Evaluate Content node Within Advanced Workflow when Intercom Chat is enabled.
Workflow (AWF)	CE-121049	Users able to change the Job Reference ID in AWF Job Troubleshooter.
Workflow (AWF)	CE-120846	AWF does not work if the instance name contains space.
Workflow (AWF)	CE-120557	AWF stops working after Windows security patches.
Workflow (AWF)	CE-121070	AWF Job Troubleshooter filter error message includes unnecessary information.

Workspaces, Dashboards and iViews	CE-121092	Statistical Reports intermittently fail to render.
Workspaces, Dashboards and iViews	CE-121040	The Japanese language translation for the Dashboard wizard properties title is incorrect.
Workspaces, Dashboards and iViews	CE-121092	Statistical Reports intermittently fail to render.
