

## Fixed Issues in Archer Platform 2024.08

Component	Issue	Description
Application Builder, Security	CE-120589	The calculation formula editor displays the Value List values in encoded format when a value list value contains "<" or ">" special characters.
Workflow (AWF)	CE-120686	Cleanup jobs timed out due to AWF DB tables containing large empty data.
Data Driven Events	CE-120807	Some unpopulated required fields on the record page are not included in the unsaved changes warning message.
IIS Web Server	CE-120871	Archer installation installs nonessential Microsoft Visual C++ Redistributable version on the installed system.
Database	CE-120908	History log cleanup jobs time out when there is a large backlog of history log records in the system.
NextGen Dashboard, Workspaces, Dashboards and iViews	CE-120910	User Default Home page is being displayed upon Save and Close the Values List Value popup window.
Application Builder	CE-120979	Start and End Dates inaccuracy when creating a new appointment using a Scheduler field.
Section 508, UI	CE-120999	Incorrect role defined for chart list and chart types list options.
API (Web, Rest, other), Reports	CE-121025	For the non-native user, the Security events API call issues an 'invalid request' error.
IIS Web Server	CE-121079	Archer Memory Exhaustion causes the Web Tier To shut down.
Data Import	CE-121139	During Data Import processing, successfully imported records are incorrectly reported as failing on progress report.
API (Web, Rest, other), Security	CE-121147	Text between "<" and ">" was being removed while using Rest API "/api/core/content" call.
Workflow (AWF)	CE-121150	The AWF jobs do not take the updated workflow version when the jobs are updated from the Job Troubleshooting page.
UI	CE-121151	Default text removed when focusing in a multiline text field but not coming back upon focusing out of the field.
Application Builder	CE-121154	Cross-reference Look Up page displays the inactive fields in Advance Search Filter section.
Database	CE-121158	Repository File Cleanup Job failing on certain scenarios.
Notifications	CE-121167	Notifications are not sent when the filter criteria operator is "Field Value Match" even when the criteria is met.
Workflow (AWF)	CE-121179	AWF system fields are being displayed in the history log field for tracking.
Application Builder, Content Save and Delete	CE-121181	Failed to save AWF transition rule when some filters are deleted and the filter order gets changed.
Database	CE-121182	While deleting the report criteria for the module, the Delete Meta Data process fails.
Workflow (AWF)	CE-121185	Deleting a transition in an AWF evaluate content node leaves orphan rules without any warning.
Application Builder, Export	CE-121187	Exporting a Questionnaire record having Question value list is adding extra lines in CSV and Excel export files.
Workspaces, Dashboards and iViews	CE-121188	Set as Home is not displayed on all dashboards.
Notifications	CE-121191	Sharepoint hyperlink getting stripped and reformatted in subscription notification email.
NextGen Dashboard	CE-121199	Numeric values are not formatted correctly on Next Gen Dashboard Report.
Questionnaires	CE-121206	Unable to add control standards reference to Question-Values List field in Questionnaire.
Calculations	CE-121215	When using OTHERTEXT function in Calculated Text field formula, the results get enclosed in Double Quotes.
Workflow (Email)	CE-121218	Confirmation email for action taken over email is not received.
Notifications	CE-121234	The On-Demand Email Template Selection page duplicates public templates when private templates are present.
Access Control: Reports, Export	CE-121238	Security Event report adds extra blank rows when exported to XLSX.
Login Home Page	CE-121240	404 error is shown on the plugins.json call upon logging in to Archer.
Export	CE-121253	Record export fails, if the text value on text field ends with an HTML <hr /> divider tag.
Globalization and Localization,	CE-121258	Numeric values in refine by displays additional zeros, when switching to German locale.
Nav Menu	CE-121261	Slowness in Navigation Menu after SaaS Non-Prod Upgrade to 2024.06

Data Feeds	CE-121263	A2A Datafeed is failing when creating records with attachments.
Data Feeds	CE-121265	Weekly Data feed Configuration does not retain schedules settings on Data feed import.
Application Builder, Calculations	CE-121270	HTML tags are removed upon saving the formula in the editor for the calculated fields
Rest API Suite	CE-121277	Error accessing "Get a Role's active permissions" Rest API endpoint after upgrading to 2024.06
UI	CE-121280	Available Users/Groups selection box does not expand Search Results section automatically.
Data Driven Events, Record Page	CE-121289	Tab sets on record page are default collapsed on upgrade to version 2024.06.
Reports, Workflow (AWF)	CE-121293	Advanced Search results displays the deleted user information, when records are filtered with the No Selection criteria on RP field.
Application Builder	CE-121295	Unable to add new sorting row under the grid display properties in the cross reference field.
Data Driven Events, Record Page	CE-121296	When the default tab gets hidden by a DDE, the focus doesn't shift to the Left Most Tab.
Master Report Listing,	CE-121302	When creating a report from the Master Report Listing page, the application name wraps to the following line.
User Profile	CE-121318	User cannot be deleted from the API, when the user account is referenced in an AWF update content node.
Search and Search Results	CE-121329	Bulk Delete or Bulk Update doesn't enable the Select All and Select None options on Reports when Fixed Headers option is selected.
Calculations	CE-121330	Trim function does not give expected results for multiline text fields.
Inline Edit	CE-121331	The inline edit 'save' icon hides, and the user cannot save changes made to the individual record.
Database	CE-121336	Missing table index causes high SQL CPU usage on Send Notification Jobs.
Record Page	CE-121337	Unchanged Fields are getting recorded in the history log as being changed.
Appearance	CE-121338	Unexpected Dragging Behavior in Application Builder Design Layout Builder Pane when Objects pane is collapsed.
Export	CE-121341	If numeric fields are limited to two decimals, exporting a report into PDF adds unwanted decimal numbers.
NextGen Dashboard	CE-121342	In next gen dashboard, inactive users are being displayed.
Data Feeds	CE-121343	The error message includes a reference to "RSA" in the Data Feed failure exception logs.
Workspaces, Dashboards and iViews,	CE-121374	Unable to delete Workspaces that only have personal dashboards created by other users.
