

# Fixed Issues in Release 2024.11

Component	Issue	Description
Data Feeds	CE-120836	Long running data feed stuck in "Terminating" status needed to be stopped manually.
Application Builder	CE-120883	Errors issued while copying an application having a <b>selfRef</b> field.
Calculated Cross References	CE-120897	The Calculated cross reference field does not populate after the user clicks on AWF user initiation button.
Record Permissions	CE-120989	When copying a record, if the <b>Record Creator</b> field isn't set to default, it retains the original value. If a different user copies the record, the field updates to the default setting.
Notifications	CE-121003	<b>Changed</b> and <b>Changed From</b> operators do not work with reminder notifications
Export, Reports	CE-121071	An error occurs when attempting to export reports in PDF, Excel, and Richtext formats.
Access Control, Access Control: Access Roles	CE-121130	Group names are not validated for uniqueness.
Database, NextGen Dashboard	CE-121213	Saving multiple reports in the NGD causes an unexpected error.
Data Feeds	CE-121250	Data feed do not create an error message in the Run Detail log.
Workflow (AWF)	CE-121260	Package Install has Advanced Workflow error "ValidationMessageTemplates:WfUploadArchiveFailure" due to violation of PRIMARY KEY constraint 'pk_wp_act'.
Reports	CE-121262	Incorrect value in multi-line text field Response Description in the Enterprise Risk application (leveled application).
Job Framework	CE-121268	Forcibly terminating a data feed can cause an incorrect final status in the data feed history.
Reports, Workspaces, Dashboards and iViews	CE-121328	Statistical reports with dates set a non-US date format in the Dashboard display the US locale date format.
Packaging	CE-121360	Fields removed from the reports while installing a package still exist in the environment.
Questionnaires	CE-121382	Field list in Target Application Conditions in Questionnaire Configuration show empty selection in configured rules.
Workspaces, Dashboards and iViews	CE-121404	Last updated timestamp for a dashboard is incorrectly displayed in the Dashboard Listing page.
Application Builder	CE-121406	Values disappear after inline editing in <b>Value List</b> fields.
Workspaces, Dashboards and iViews	CE-121409	Links list iView has a 256 character limit, causing some links to get truncated.
Reports	CE-121459	Subform field values are not displaying in report search for some records when adding a subform filter criteria in the Advanced Logic.
NextGen Dashboard, Workspaces, Dashboards and iViews	CE-121460	Reports with many columns are not displaying correctly in NGD.

Database	CE-121475	Roles added manually then removed clear the existing roles from the database.
Database	CE-121479	Archer upgrade fails with the error message "Invalid object name 'tblVFieldHistoryOptions_BackUp'" when performed by a user with a different database schema.
Access Control, Access Control: Reports	CE-121500	Roles mismatch between the Users page (Roles) and User Accounts (Report).
API (Web, Rest, other)	CE-121504	Security Events Report API returns error with a page option.
Workspaces, Dashboards and iViews	CE-121505	User with record access is not able to view a dashboard containing links list iView of records.
Access Control	CE-121512	The assigned groups column name is misleading.
Data Publications	CE-121516	A database timeout occurs when running a SDP with a very large amount of data to be published.
ACP	CE-121517	Configuration Report from ACP shows the MAXDOP of the server instead of the instance.
Reports	CE-121522	An additional apostrophe at the end of the URL makes the link inaccessible.
Workflow (AWF)	CE-121528	Advanced Workflow skips Looping transition when there is no incoming transition on Looping nodes.
Notifications	CE-121547	The attachment sent in the scheduled report distribution does not have the filters and the value list images.
Workflow (AWF)	CE-121557	Instances without valid database connections disrupt AWF functionality.
Security, Workflow (AWF)	CE-121558	AWF Job Troubleshooter Filter passes unnecessary information in the error message.
View Mode (Record)	CE-121559	Attachments are re-added after removal from copied record
Appearance, Globalization and Localization, Multilingual, UI	CE-121561	Globalization-Section description translation text is cut off after a character limit.
Notifications	CE-121569	<b>Text Key</b> fields on Notification display as plain text instead of a hyperlink.
ACP, Config Service Client	CE-121572	Opening an instance in ACP takes more than a minute to open.
Nav Menu, Workspaces, Dashboards and iViews	CE-121574	Clicking the iView link in the classic dashboard redirects to another dashboard, causing the navigation menu to duplicate.
Notifications, Packaging	CE-121581	Notifications are updated even when letterhead has not changed.
Data Feeds	CE-121595	Weekly data feed is faulting if more than one day is selected in <b>Weekday</b> field.
Install/upgrade, Notifications	CE-121596	Getting emails From "@rsa.com" if used in From Address.
Mgmt & System Reports, Notifications	CE-121599	User who does not have permission to any of notification types can see all notifications in "notification sent" report.
Database	CE-121602	Database fails to upgrade to 2024.09 (6.15.00300.10238) in US SaaS NonProd.

NextGen Dashboard, Workspaces, Dashboards and iViews	CE-121605	Display record limit applied to parent records is being applied to child records in hierarchy report
Calc Engine	CE-121606	Calc errors persist in the Job Framework Logs when a Full Recalculation is triggered for an application with an inactive, dependency-free field.
Application Builder	CE-121617	Filters <b>Equal</b> and <b>Does not Equal</b> in the status column in the Manage Application Listing page do not work.
Nav Menu	CE-121624	Ellipsis of application action menu is always visible in NavMenu.
Questionnaires	CE-121627	Year and quarter are not showing for a campaign in Portuguese questionnaire.
