

Fixed Issues in Release 2025.02

This section lists the issues that have been fixed in the current release.

Component	Issue	Description
Data Feeds	CE-120836	Long running data feed stuck in 'terminating' status and must be stopped manually.
Application Builder	CE-120883	Display an error while copying an application having a selfRef field.
Calculated Cross References	CE-120897	The Calculated cross reference field does not populate after the user clicks on AWF user initiation button.
Record Permissions	CE-120989	When copying a record, if the "Record Creator" field isn't set to default, it keeps the original value. If a different user copies the record, the field updates to the default setting.
Notifications	CE-121003	Changed and Changed From operators do not work with reminder notifications
Export, Reports	CE-121071	An error occurs when attempting to export reports in PDF, Excel, and Richtext formats.
Access Control, Access Control: Access Roles	CE-121130	Group names are not validated for uniqueness.
Database, NextGen Dashboard	CE-121213	When user saves the multiple reports in the NGD, it causes unexpected error.
Data Feeds	CE-121250	Data feed gets faulted with no error message in the Run Detail log.
Workflow (AWF)	CE-121260	Package Install has Advanced Workflow Error "ValidationMessageTemplates:WfUploadArchiveFailure" due to Violation of PRIMARY KEY constraint 'pk_wp_act'.
Reports	CE-121262	Wrong value was written in multi-line text field 'Response Description' in the Enterprise Risk application (Levelled application).
Job Framework	CE-121268	Forcibly terminating a data feed can result in the data feed history having an incorrect final status.
Reports, Workspaces, Dashboards and iViews	CE-121328	Statistical reports with dates set to the any other locale other than US date format in the dashboard are showing the US locale date format.
Packaging	CE-121360	Fields removed from the reports while installing a package still exist in the environment
Questionnaires	CE-121382	Field List in Target Application Conditions in Questionnaire Configuration show empty selection in configured rules.

Internal Use

Workspaces, Dashboards and iViews	CE-121404	Last Updated Timestamp for a Dashboard is incorrectly displayed in the Dashboard Listing page.
Application Builder	CE-121406	Values disappear after Inline Editing in Value List fields.
Workspaces, Dashboards and iViews	CE-121409	Links list iview has a 256-character limit, causing some links to get truncated.
Reports	CE-121459	Subform field values not displaying in report search for some records when adding a subform filter criteria in the Advanced Logic.
NextGen Dashboard, Workspaces, Dashboards and iViews	CE-121460	Reports with more columns are not displaying correctly in Next Gen Dashboard.
Database	CE-121475	Roles add manually and then remove clear the existing roles from the DB.
Database	CE-121479	The Archer upgrade fails with the error message 'Invalid object name 'tbIVFieldHistoryOptions_BackUp' when performed by a user with a different DB schema.
Access Control, Access Control: Reports	CE-121500	The role mismatch between the Users page(Roles) and User Accounts(Report).
API (Web, Rest, other)	CE-121504	Security Events Report API returns error with page option.
Workspaces, Dashboards and iViews	CE-121505	The User Having the Permission for the Record is not able to view the DashBoard having lview created with LinkList Consisting Of Records.
Access Control	CE-121512	The assigned groups column name is misleading.
Data Publications	CE-121516	A database timeout occurs when running a SDP with a very large amount of data to be published.
ACP	CE-121517	Configuration Report from ACP shows the MAXDOP of the server instead of the instance.
Reports	CE-121522	An additional apostrophe adds at the end of URL and makes the link inaccessible.
Workflow (AWF)	CE-121528	Advanced Workflow is skipping Looping transition when there is no incoming transition on Looping nodes.
Notifications	CE-121547	The attachment sent in the scheduled report distribution does not have the filters and the value list images , unlike when exporting the report directly.
Workflow (AWF)	CE-121557	Instances without valid database connections cause AWF functionality to be disrupted.
Security, Workflow (AWF)	CE-121558	AWF Job Troubleshooter Filter passed unnecessary information in the error message.

View Mode (Record)	CE-121559	Attachments are re-added after removing them from copied record.
Appearance, Globalization and Localization, Multilingual, UI	CE-121561	Globalization-Section description translation text is cut off after specific characters limit.
Notifications	CE-121569	Text key fields on Notification display as plain text instead of a hyperlink.
ACP, Config Service Client	CE-121572	Opening an Instance in ACP takes more than a minute to open.
Nav Menu, Workspaces, Dashboards and iViews	CE-121574	Clicking the iView link in the classic dashboard redirects to another dashboard, causing the navigation menu to duplicate.
Notifications, Packaging	CE-121581	Notifications are updated even when letterhead has not changed.
Data Feeds	CE-121595	Weekly data feed is faulting if more than one day is selected in Weekday field.
Install/upgrade, Notifications	CE-121596	Getting Emails From "@rsa.com" if used in From Address.
Mgmt & System Reports, Notifications	CE-121599	User who does not have permission to any of notification types can see all notification in "notification sent" report.
Database	CE-121602	Database fails to upgrade to 2024.09 (6.15.00300.10238) in US SaaS NonProd.
NextGen Dashboard, Workspaces, Dashboards and iViews	CE-121605	Display record limit applied to parent records is being applied to child records as well in hierarchy report
Calc Engine	CE-121606	Calc errors persist in the Job Framework Logs when a Full Recalculation is triggered for an application with an inactive, dependency-free field.
Application Builder	CE-121617	Filters 'Equal' and 'Does not Equal' on the Status column in the Manage Application Listing page do not work.
Nav Menu	CE-121624	Ellipsis of application action menu is always visible in NavMenu.
Questionnaires	CE-121627	Year and quarter are not showing for a campaign in Portuguese questionnaire.
Master Report Listing	CE-121630	Report filter using Equals Operator for module names that include a colon (:) do not work.
Data Driven Events	CE-121640	Date field returns blank when it has set date DDE and the date field is not in the selected tab.
Application Builder	CE-121644	Unable to copy textbox or custom objects.
Data Import, Globalization and Localization	CE-121645	Application Field Names in Data Import Wizard are shown in English when using Japanese locale.

Admin Dashboard	CE-121646	DBStorageUtilized field value is coming as 0.00 GB for Admin Dashboard Application after the Admin Dashboard Job execution.
Database	CE-121647	Missing Index on table tblIVGroupContent.
HTML Sanitizer, Notifications	CE-121655	Letterheads are blank in email notifications.
Questionnaires	CE-121659	The Question Library fails to display when the user enables the checkbox.
Notifications	CE-121670	A validation error prevented the notification from being saved because the subject line of a text field contained the "&" symbol.
Export	CE-121673	An error shows when the statistical report uses the "Count of" field in the related application upon export.
Application Builder	CE-121678	Default selection value was not displayed correctly in application record permissions summary report
Reports	CE-121680	The "Add New" button click prompts the user to select the application name again when creating an application-specific report.
Record Page	CE-121688	Duplicate level IDs causes an unexpected error when attempts to open or create a record.
Access Control: Access Roles	CE-121694	The Engagement Risk Assessment Questionnaire cannot be edited once the Publish is Successful.
Custom Interface Objects	CE-121698	Text Box content is removed after saving.
Packaging	CE-121702	Manage Packages and Package Installation Log pages show No Records to Display even when there is data to show
UI	CE-121704	Unable to navigate through the table cells in the text area field using the Tab key.
Data Import	CE-121706	Data import mapping is missing for Value list "Other text".
Export	CE-121730	On exporting a report in CSV format, unexpected results for the Unicode character "—" (U+2013) appear in the value list values within a record.
Application Builder	CE-121732	The "Other" option is toggled off when importing a value list value with the "Other" option enabled.
Data Import	CE-121740	The 'Lookup fields' dropdown does not appear on the Mapping tab of the Data Import Wizard when the UI locale is not English (United States).
ACP, Jobs	CE-121747	Scrolling Down in Job Diagnostics tab in Job Engine Manager Plugin of ACP is not enabled/functioning.
Data Publications	CE-121749	Children values for Value list values were not added to the SQL script after running smart data publication.

Internal Use

Access Control: Access Roles	CE-121769	Roles assigned to users via groups were not getting removed after removing the users from those groups.
Export, Global Print and Export, Reports	CE-121770	Exporting reports of type "Shared" results in incorrect file name.
Calculations	CE-121324	ROUNDDOWN function is Off by .01 when we have more than 3 digits.
Bulk Operations	CE-121385	Unable to search for cross-referenced records when using the Bulk Update option.
Reports	CE-121402	In statistical report, records with no selection value does not displays correctly in drill when using contains inclusive on a VL
Jobs	CE-121465	Improve performance of the job migration stage of the Archer installer.
Workflow(AWF)	CE-121597	AWF is not getting triggered based on Fields Selected.
