Fixed Issues in Release 2025.04

This section lists the issues that have been fixed in the current release.

Note: When users upgrade from Archer versions prior to 6.9.1.1 to Archer versions 6.9.1.1 or above, the work item cleanup to improve the Advanced Workflow performance might delay the installation.

Component	Issue	Description
Access Control: Access Roles	CE-121864	Potential memory leak while navigating in the Access Role Rights grid.
ACP, Appearance, SAML, UI	CE-122627	SSO Provider Not available in Dropdown by Default on New Login Page
