Revised: January 2025

## Known Issues in NGRX May 9, 2025 release

This section lists reported issues that remain unresolved as of the latest release. Wherever a workaround is available, it is noted or referenced in detail. For many of the workarounds in this section, you must have administrative privileges.

Component	Issue	Description
NGRX Advanced Search	NGRX-6325	When viewing a Search Report page from a Report Object, the report's selected fields and filters are not displayed while editing the report
NGRX Record Page	NGRX-6451	AWF Enrollment and Processing dialog flickers during screen transitions.
NGRX Record Page	NGRX-6019	The AWF field for Workflow Current Node will return as copiable in the API response when it should return as not copiable. This will be fixed in the Archer Platform Release 2025.06 so that the option is not selected in App Builder

## Resolved Issues in NGRX May 9, 2025 release

This section lists reported issues that remain unresolved as of the latest release. Wherever a workaround is available, it is noted or referenced in detail. For many of the workarounds in this section, you must have administrative privileges.

Component	Issue	Description
NGRX Advanced Search	CE-122462	The cross-reference lookup on the NGRX record page does not support filtering based on the configuration of the 'field value match' criteria.
NGRX Record Page	NGRX-6322	Hierarchical tabular data in report object doesn't support report object filters
NGRX Record Page	CE-122736	The default fields that are off layout are not working when added to DDE filters
NGRX Record Page	CE-122853	Some cross-referenced fields in the CR grid are missing data.
NGRX Record Page	NGRX-6399	Child records are not loading in the hierarchical report when selecting 'Display Report' on the Report object.
