Revised: January 2025

Known Issues in NGRX.2025.05 release

This section lists reported issues that remain unresolved as of the latest release. Wherever a workaround is available, it is noted or referenced in detail. For many of the workarounds in this section, you must have administrative privileges.

Component	Issue	Description
NGRX Advanced Search	NGRX-636	'Filter by record' filter is not supported in the exported search results.
NGRX Record Page	ARCHER-167583	Text Box Layout Object is always visible on NGRX Record page regardless of the configuration settings for the Layout Object.

Resolved Issues in NGRX.2025.05 release

This section lists reported issues that remain unresolved as of the latest release. Wherever a workaround is available, it is noted or referenced in detail. For many of the workarounds in this section, you must have administrative privileges.

Component	Issue	Description
NGRX Record Page	ARCHER-167431	Users can't save records if off-layout field validation triggers. However, error messages are not displayed on the record page.
NGRX Record Page	ARCHER-165172	Unable to save a newly created parent record when a new cross-referenced record is added to it.
NGRX Record Page	CE-122274	Displaying the date picker drop-down requires placing the pointer at a very precise location. The click target should be larger for ease of use.
NGRX Record Page	CE-121973	Unable to open Engagements Application records in the new user experience.
